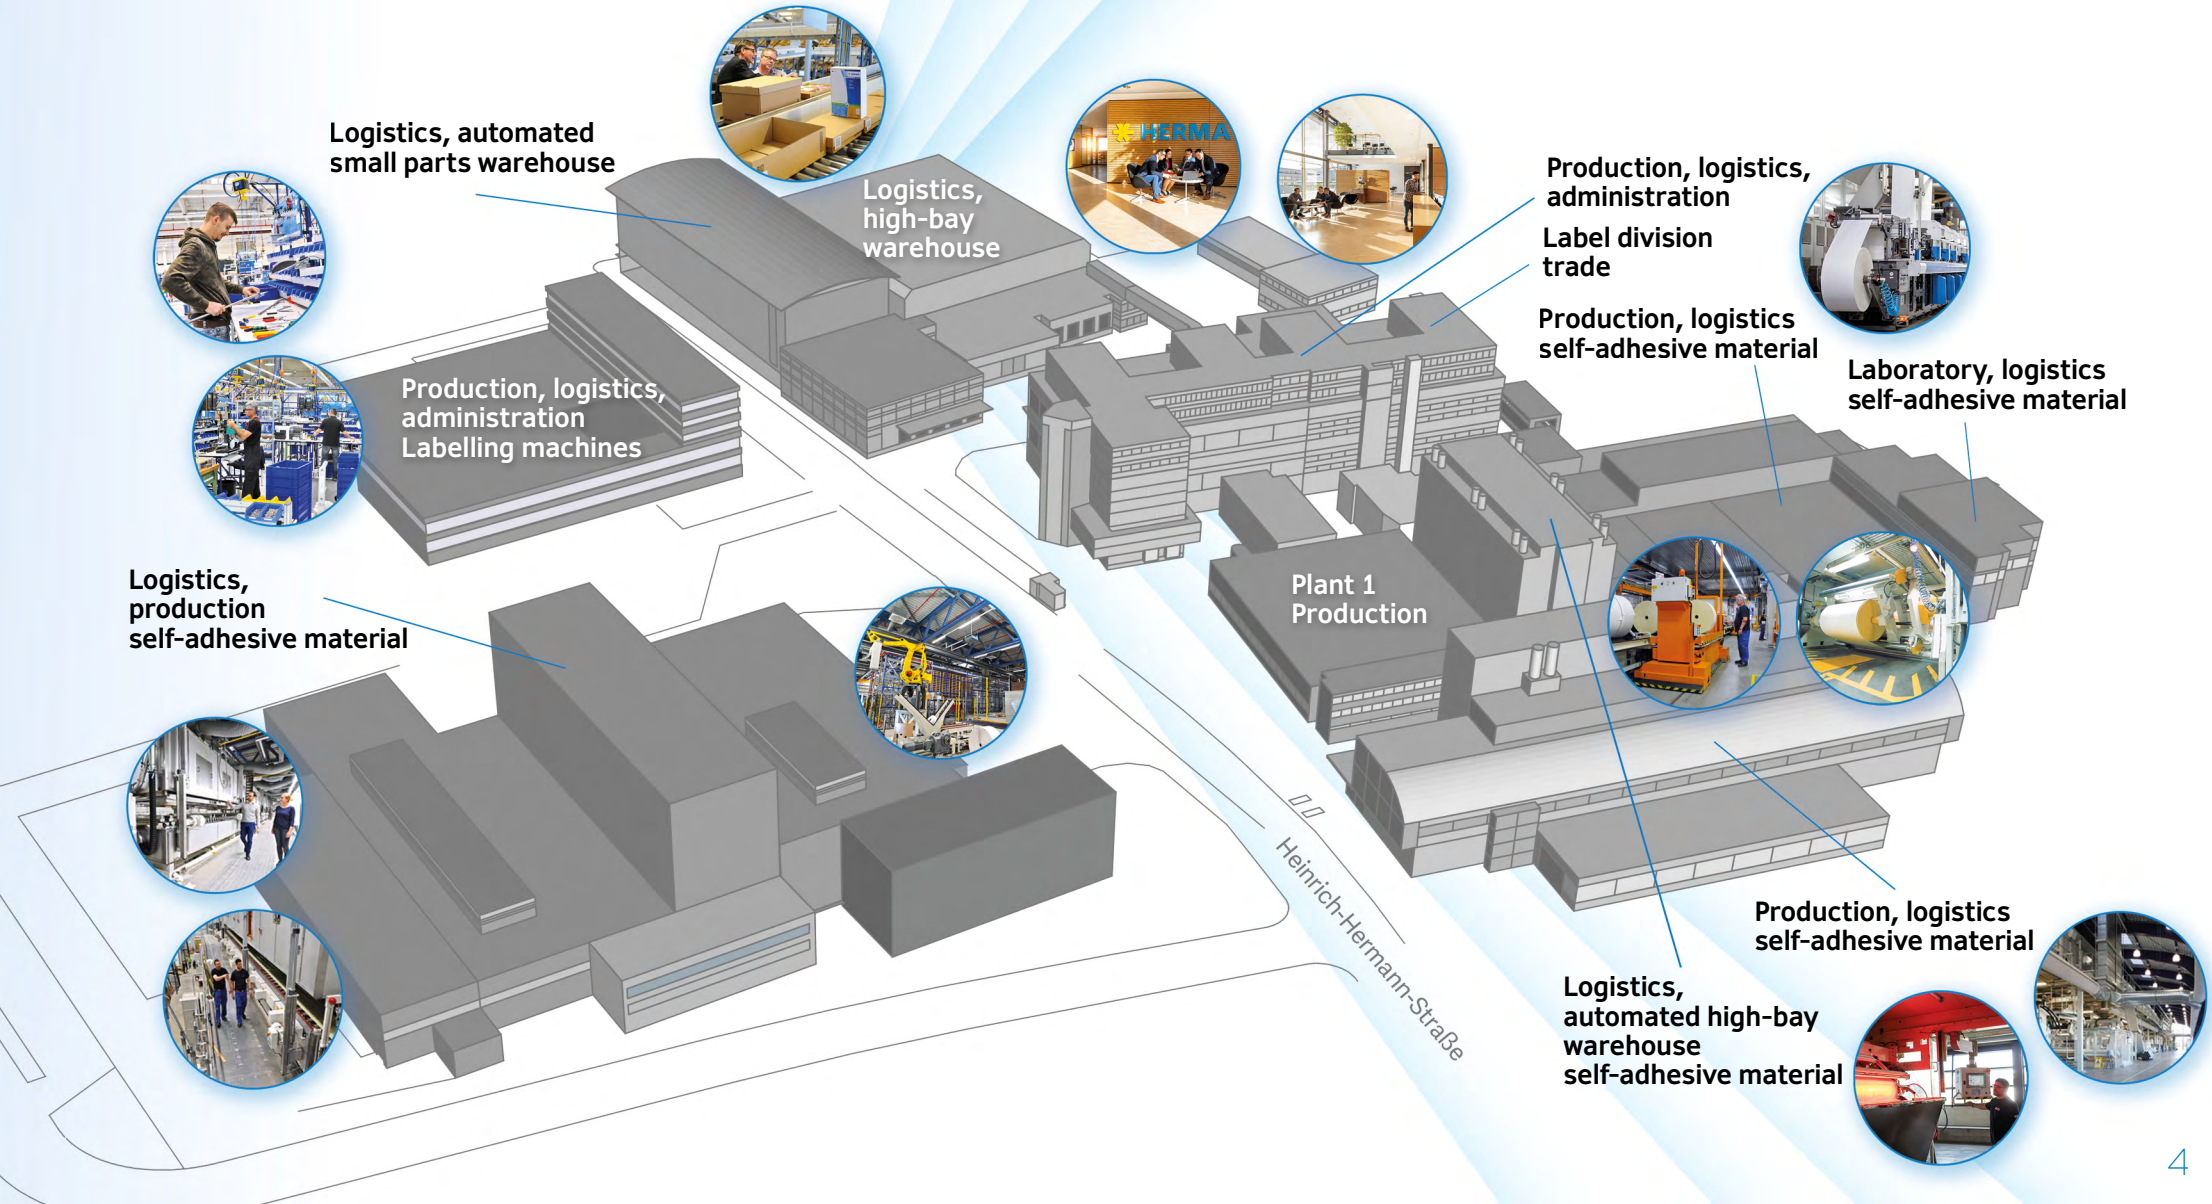
HERMA CAMPUS

With a continuous chain of expertise that is probably unique worldwide, HERMA is able to develop the most suitable solutions for numerous industries and fields of application, from self-adhesive materials to label variants and labelling technology.

Everything from a single source

From development and production to sales and distribution - everything you need in one place.
Our large site in Germany allows us to design the entire production process to be efficient and of high quality.



Made in Filderstadt Germany!

**Short distances, state-of-the-art facilities,
from the self-adhesive material to the high-quality label**

This is how quality is created – from the raw material to the label

The self-adhesive material for HERMA labels is manufactured with the utmost precision on state-of-the-art coating machines – for maximum printing reliability and trouble-free application. The entire production process takes place at one location, from the processing of raw materials to the finished label. Short distances save on transportation and conserve resources. Quality, sustainability and efficiency – Made in Germany.

Company-owned laboratory

The HERMA laboratory is a crucial part of the company, ensuring both the innovative strength and the reliability and quality of the products

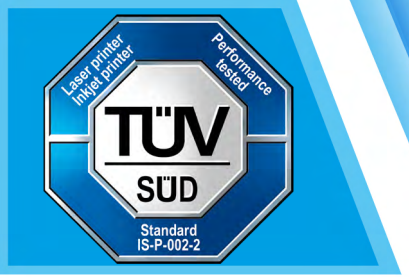
- **Drive innovation:**
  Customised solutions for customer requirements are developed quickly and efficiently.

- **Guaranteeing the highest quality:**
  Each batch of labels is tested to ensure that they meet strict standards.

- **Tested and approved:**
  PREMIUM A4 labels: TÜV Süd-certified, guaranteed jam-free and high-speed capable – no paper jams.

- **Speed and flexibility:**
  Customer requests can be implemented quickly and new products brought to market faster.

- **Promoting sustainability:**
  Research and testing support HERMA in the development of environmentally friendly products.



Sustainable labels

Environmentally friendly from the outset, of course

FSC
www.fsc.org
FSC™ C110972
The mark of responsible forestry

HERMA is committed to environmentally friendly labels that meet the highest ecological standards. Since 2012, our self-adhesive material and labels have been certified according to the strict FSC ™ Mix Credit guidelines (FSC ™ Mix Credit-110972). All raw paper comes from well-managed FSC™ Mix Credit-certified forests, recycled materials and/or other controlled sources. From the selection of certified raw materials to the self-adhesive material and the production of labels, all production steps are designed with sustainability in mind.

HERMA labels in FSC™ Mix Credit quality are highly versatile:

- On A4 sheets for laser printers, inkjet printers and photocopiers
- In various formats and pack sizes

These labels not only guarantee quality, but also make a valuable contribution to the conservation of resources – sustainability that impresses.

PREMIUM

THE HERMA PREMIUM assortment

Maximum choice for every application:
With around 70 different formats, the range offers the perfect solution for every PREMIUM application – precise and versatile.

Packaging units:
The ideal quantity for every need – 10, 25, 100, 200 or 500 sheets per box for selected formats, perfect for smaller or larger projects with big demands.

Individual format selection:
For even more flexibility, selected formats are available with both sharp and rounded corners – for maximum customisation.

For every PREMIUM application:
The extensive range covers every PREMIUM requirement and guarantees the highest quality and perfect fit, perfectly tailored to your needs.

Label quality that sets standards – at the best price:
High-quality products, an outstanding price-performance ratio and a wide range of products make this offer on the label market unique. HERMA impresses with reliable quality, variety and cost-effectiveness – optimally positioned for every need.

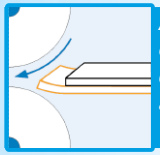
PREMIUM labels from HERMA –

the perfect symbiosis of quality, functionality and sustainability.

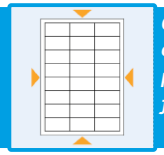
- **Optimised printing and processing properties:**
  Jam-free printing: suitable for all common printer types,
  TÜV Süd-certified: guaranteed jam-free and smooth – no paper jams.

- **Extra-strong composite material:**
  Enables high-speed printing and makes it easier to peel off and stick on the labels.

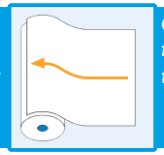
- **Perfect flatness and all-round protective edge:**
  Ensures optimal processing and prevents adhesive from leaking during the printing process.



All-round protective edge, thus no deposits of adhesives



Cleanly trimmed edges all round, preventing paper jams



Optimal flatness thanks to high flexibility

- **Reliable adhesive:**
  Excellent bonding properties: both initial and final adhesion are outstanding, even on damp surfaces.

- **Excellent speciality paper:**
  Optimum readability thanks to a strong contrast is made possible by labels with a high degree of whiteness of 155–160 (CIE) / 175–180 (ISO)

- **High opacity:**
  The opacity of over 90% ensures a flawless appearance, as show-through is avoided.

- **Wide temperature range:**
  The labels can be used at temperatures between -30 °C and +80 °C and already adhere at -10 °C, which emphasizes their versatility.

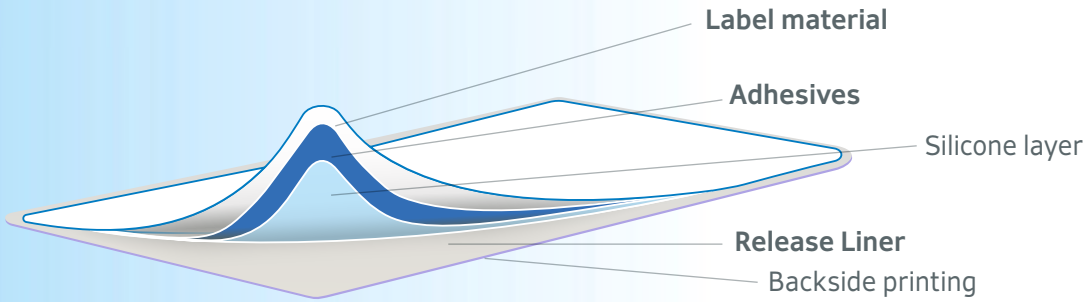
PREMIUM

Material composite

**Short distances, state-of-the-art facilities –
from the self-adhesive material to the PREMIUM label**

Adhesive materials

are the finished composites of three main components.



Label material

High-quality paper with a high degree of whiteness, high opacity and an extra-strong material bond are the components for the perfect label.

Adhesives

HERMA has a functional adhesive for every material. PREMIUM labels have a permanent, solvent-free, acrylic-based dispersion adhesive that is free from plasticizers and acids and pH-neutral. In addition, almost all of our standard adhesives are ISEGA-certified for direct contact with food.

Release liner

A white, one-side coated kraft paper is used here: due to its high suppleness and coordinated smoothness on the reverse side, it is very suitable for use in all printers and photocopiers.

Removable labels

for changing information – on paper and film

- Adhere securely and can be removed without leaving any residue – ideal for temporary labelling
- Versatile for use in offices, retail, warehouses, production facilities or at home
- Available in paper or polyester film – suitable for a range of indoor and outdoor applications

The right solution for changing information

Removable labels are used wherever information is only needed temporarily or needs to be updated regularly. In commercial settings, they help streamline processes in offices, warehouses, retail and production environments. At home, they ensure flexible organisation and clear labelling. Depending on the application, paper offers the ideal solution for standard organisational tasks, while polyester film is the perfect choice wherever extra durability is required.

Removable labels

Temporary labelling – removable, clean, reliable!

- **Temporary marking without damaging the surface:**
  They are used when information is only temporarily valid or changes regularly (e.g. stock, dispatch, price and promotional labelling) and the label needs to be removed cleanly at a later date. They are particularly suitable for cardboard boxes, PE films and steel, amongst other applications. The removable adhesive is designed to provide a defined level of adhesion and is ideal for all types of temporary labelling.

- **White and coloured paper labels for clear organisation:**
  White paper is suitable for neutral labelling; coloured paper labels aid visual organisation, prioritisation and process logic (e.g. product groups, status, responsibilities) without making the system ‘permanent’ – because the labels can be removed again.

- **Matt white – reduces glare, improves readability:**
  The matt white label material minimises glare and ensures reliable identification of information and barcodes, particularly for standardised labelling in warehousing, logistics and the office.

- **Opaque coating prevents show-through – for clear information:**
  In this product range, an opaque coating on the reverse side ensures excellent opacity: previous markings do not show through, thereby reducing mix-ups and the transmission of incorrect information within workflows.

- **Polyester film – the removable solution for harsher environments:**
  Removable PET film labels are used in situations where labels are subjected to greater mechanical stress or environmental influences (e.g. smudge resistance). They combine durable material with a removable application.

Removable labels

Paper, white

- Adheres securely and peels off without leaving any residue
- Opaque versions reliably cover up old lettering
- Excellent print results on all standard laser and inkjet printers
- Smooth handling thanks to optimal flatness

For everything that might change

Removable HERMA labels are the ideal solution when labels need to be changed or removed regularly. They adhere reliably, can be removed cleanly, and ensure a tidy appearance. White versions are suitable for changing labels, while opaque versions are also ideal for securely covering existing information. This makes labelling simple, flexible and professional.

Removable labels

in standard colours

- Clear colours for clear organisation
- Ideal for a clear overview, for prioritising tasks and for supporting workflows
- Rooms, supplies and documents – efficiently organised and instantly recognisable

Reliable colour coding for professional workflows

Available in the four standard colours – red, yellow, blue and green – in various formats and two pack sizes to suit every need.
The labels on A4 sheets deliver precise print results and are available with either permanent or removable adhesive. Ideal for sorting, labelling and visual management in the office, warehouse or dispatch department.

[1)] peel-off aid on reverse (cuts)

Removable labels

Polyester film, white

- Durable polyester film – weatherproof, UV-, temperature- and ageing-resistant
- Sticks well yet peels off without leaving any residue
- Ideal for outdoor use – e.g. shop window stickers, product labels or temporary signs
- Resistant to oil, dirt and moisture

Powerful in use, flexible to remove

In the commercial sector, removable film labels are the ideal solution for temporary product labelling, warehouse signage, whiteboard signs and property labels. In the home, too, they provide practical and durable labelling – for example, on storage boxes, appliances, windows or outdoor furniture. They combine high durability with the flexibility required when information needs to be changed.

Coloured labels

In standard & neon colours

- Ideal for signs and promotional stickers
- For all types of identification and for all settings: home offices, offices, industry, laboratories, retail and wholesale, etc.
- Available in yellow, red, blue, green, neon yellow, neon red, neon orange and neon green

Labels that think for themselves – and stick where they are supposed to

Whether round or square, with or without a border: these coloured labels on A4 paper offer the right format for every application. Permanently adhesive for long-lasting identification or removable for flexible use. And because sustainability can stick too: naturally, FSC™ Mix Credit-certified label material from responsibly managed forests.

Coloured labels

In neon colours

- High-impact colours for maximum attention: yellow, red, orange, green
- Perfect for warnings, promotions or urgent messages
- Intense colours for visual clarity without misunderstandings

Standing out has never been so easy

Neon labels create a visual impact where clear signals are required. With their intense colours, they magically attract attention and bring information into focus in a targeted manner. Whether as a warning, a special offer or a priority label. This way, no message gets lost.

Wind and weather labels

Made for any climate!

- **Ideal for heavy-duty labelling and extreme situations**
- **Wide range with multiple pack sizes and numerous label formats**
- **Weatherproof, strong adhesive and resistant to seawater and extreme temperatures**

Weatherproof. Strong adhesion. Superior.

Whether sun, rain, or frost – these labels deliver what they promise. For anyone who values durable labelling: robust material, strong adhesion, and reliability in any environment. Perfect for use in production, warehouses, and outdoor applications – anywhere performance counts.
A wide range of products ensures flexible and cost-effective applications. Produced to the highest quality standards in Germany – quality that impresses!

Outdoor film labels

Assortment and application

- Extremely strong adhesion, even on critical surfaces
- Weatherproof, resistant to aging, oil- and dirt-repellent, washable, resistant to temperatures between -40 °C and +150 °C and seawater-resistant
- Stretchable: Ideal for adapting to curved surfaces
- High opacity: Ensures clear colours, strong contrasts, and optimal readability

For tough outdoor use.

For robust special requirements, such as outdoor applications, the label material must be 100% reliable.
HERMA outdoor labels with extra-strong adhesion perform exceptionally well even under extreme conditions. They are suitable for all surfaces, including metal and plastic, and can be applied to critical substrates (such as rough, damp, cold, warm, or dusty surfaces).

Weather-resistant labels

Assortment and application

- Special impregnated paper, FSC™ Mix Credit-certified and with extra-strong adhesion
- Reliable for outdoor use – weather-resistant, age-resistant, saltwater-restistant
- Strong adhesion to metal, plastic, glass and other demanding surfaces
- Smudge-proof, oil- and dirt-repellent for long-lasting readability
- resistant to temperatures between –30 °C and +80 °C

Strong as film, flexible as paper

Ideal for long-lasting labelling for indoor and protected outdoor use: these weather-resistant labels made of special paper impress with their high resistance to moisture, dirt and temperature fluctuations. They adhere reliably to a wide variety of surfaces and remain easy to read even under demanding conditions – perfect for shipping, storage, production, and for information and warning labels with a clear signalling effect.

Polyester labels

Assortment and application

- Ideal for high-wear identification outdoors, in warehouses and production areas, as signal, information and warning signs, etc.
- Removable for temporary or changing labelling; peels off without residue
- Strong adhesion for permanent labelling
- Weatherproof, UV- and ageing-resistant, oil- and dirt-repellent, washable, temperature-resistant between –30 °C and +80 °C, seawater-resistant
- Tear-resistant polyester film: hard-wearing under extreme conditions

Make a good impression even under difficult conditions

Wherever conventional paper labels reach their limits, these polyester labels really come into their own. They are suitable for permanent identification both indoors and outdoors and – available in white or yellow, with either a strong permanent adhesive or a removable adhesive. They offer the right solution for a wide variety of applications, from neutral identification to eye-catching signal and warning notices.

Power labels

Designed for surfaces that demand more

- Double the adhesion, for tricky situations: suitable for damp, warm, cold, rough or dusty indoor surfaces, including curved surfaces.
- Ideal for reliable labelling: for products, stock, safety and warning notices, for wrapping round objects, as inspection stickers or seal labels
- Simply print and achieve reliable identification: for excellent print results in black and colour.

When ordinary labels reach their limits

HERMA Power Labels show what they're made of. They adhere roughly twice as strongly as conventional paper labels and are made from FSC™ Mix Credit-certified label material sourced from responsibly managed forests. Thanks to their all-round protective edge, optimal flatness and solvent-free adhesives, the labels feed reliably through the printer – and then stick securely in place.

Name and textile labels

Show names. Make contacts.

- Ideal for seminars, conferences, trade fairs and events
- Easy to print on or write on by hand
- Made from self-adhesive acetate silk or cardboard
- Clear, easy-to-read name labelling
- Quick to prepare directly on A4 sheets
- A professional solution for personalised addressing and better wayfinding

For personalised encounters and systematic labelling

With HERMA name and textile labels, as well as insert labels every presentation is given a personal touch. These solutions are easy to print on or write on by hand, ensure clear labelling and make it easy to address people personally.
The self-adhesive textile labels are also a practical solution for the catering, hotel, retail and service sectors. They are also suitable for identification of fabrics, carpets, mattresses and other flexible materials in retail, for example for barcodes, care instructions or price information.

Name and textile labels

Made from acetate silk.
Sticks to the name. Not to the outfit.

- Self-adhesive labels made from acetate silk
- Adhere securely to many textiles and are removable without leaving any residue
- Suitable for laser printers and colour laser printers
- Also suitable for identification of fabrics, carpets, mattresses and flexible materials

Quick to print, adheres securely and is removable without leaving any residue

Name and textile labels make personalised communication simple and professional. The flexible fabric material feels comfortable against the skin, adheres securely to many fabrics and can be removed without leaving any residue after use. Easy to print on, ready to use in no time and requires no pins, clips or ironing.

Not suitable for fine leather, leather and delicate fabrics such as silk, velvet or corduroy. May cause staining.

Inserts for name badges

Plug it in, switch it on, get it working.

- White cardboard inserts for classic name badge holders
- Ideal for seminars, conferences, meetings and fairs
- Suitable for printing or writing on by hand
- Quick and easy to separate thanks to micro-perforation
- Suitable for reusable name badge holders with a clip or magnet

Printed cleanly and separated quickly

Cardboard insert name badges ensure clear, high-quality name identification in classic name tag holders. The white cardboard inserts can be printed on cleanly or labelled by hand and can be separated quickly and precisely thanks to micro-perforation. Ideal for reusable name badge holders with clips or magnets – professional in appearance, practical to prepare and reliable in use.

Decorative labels

Stick it. Enhance it. Make it stand out.

- High-gloss labels for striking product presentations that add eye-catching accents to bottles, flasks, jars and gifts
- Silver film labels for an elegant, metallic look on packaging, files, boxes, products and equipment
- Universal inkjet labels for vibrant, customised designs with a decorative effect
- Transparent film labels for the no-label-look on glass, bottles, bathroom products, gifts, documents and high-quality mailings
- Simply design and print them yourself – for personal ideas, small product runs, presentations and professional displays

For elegant touches and vibrant colours

Decorative labels are the little details that turn products, gifts, packaging and documents into real eye-catchers. Whether glossy, silver, vibrantly coloured or classically versatile, they make it easy to bring ideas to life, customise them with personalised printing and showcase them to great effect. High-gloss labels give bottles, jars and product packaging a brilliant appearance. Silver labels add elegant touches and instantly enhance the perceived value of items. Universal inkjet labels perfectly reproduce colour and detail while delivering professional results. Transparent labels create that special no-label-look – subtle, high-quality and almost as if printed directly onto the surface.
This is how organisation becomes design.

High-gloss labels

Assortment and application

- Photo-quality printing with a glossy finish for vibrant labels, product packaging and presentations
- Inkjet printing with sharp, crisp black outlines and brilliant colours – even the smallest text and barcodes are reproduced with precision
- Dries instantly and is smudge-proof and lightfast for clean results straight after printing

Shines, adheres, impresses.

Whether it's a product range, a promotional label, a display sample or a gift: high-gloss labels make brands, products and ideas visibly more attractive. Simply design them on your computer, print them and use them as you wish. For brand recognition, identification and creating an elegant, professional look. Whether on bottles, jars, packaging or documents, they add a touch of glamour that transforms the everyday into something truly special: from high-quality product labels right through to personalised gifts.

Silver film labels

Assortment and application

- Shiny silver polyester film for an elegant, high-quality finish
- Permanently adhesive for reliable identification on a wide range of suitable surfaces
- Suitable for laser printers – ideal for custom designs and printing
- Versatile for use on products, gifts, invitations, folders, boxes and much more
- Easy and professional to design with the HERMA Label Assistant online or using suitable templates

Permanent adhesion meets a sophisticated silver look

Whether it's a product label, a folder, an e-bike, a bicycle, a box, gift wrapping or a toolbox: shiny silver labels instantly add a touch of class to items. They enhance, organise and provide identification – in both business and private settings.
On products, containers, documents or for gifts and gift wrapping. They add high-quality, tasteful touches and make lettering look visibly more attractive with an elegant sheen.

- Precise reproduction of small text, fine details and barcodes
- Dries instantly and is smudge-proof, with permanent adhesion
- FSC™ Mix Credit-certified label material made from responsibly managed forests

For labels that show more than just text

Whether for addresses, folders, postage, storage jars, presentation folders, gifts or decorations: HERMA Inkjet Universal Labels bring order, colour and a decorative touch to everyday labelling. They are easy to design, produce brilliant print results and can be used immediately after printing. This means that labels are not only practical, but also visually appealing. Whether at home, in the office or anywhere, labels decorate, create structure, enhance contents and leave an all-round professional impression.

Transparent labels

Assortment and application

- No-label effect – the lettering looks almost as if it were printed directly onto the surface
- Matt or crystal-clear gloss
- For decorative and professional applications

Invisibly beautiful. Visibly special.

Transparent labels are ideal when you want the text to stand out, but the object itself to remain the focus. The matt version blends discreetly into coloured surfaces, envelopes, storage tins or gift packaging. Crystal-clear, glossy labels really come into their own on shiny surfaces: for candles in glass jars, bathroom products, spice tubes, Advent calendar jars or hand-made party favours. The result is a no-label look, where the inscription appears to be printed directly onto the surface rather than applied as a label, creating a personalised and high-quality finish.

File spine labels

Permanent and removable

- Available in white, standard colours and a wide range of sizes
- Top quality and excellent performance
- Perfect for labelling – free of charge – with the LAO
- Permanent: for long-term and frequent use or archiving
- Removable: for changing files and contents; peels off cleanly without leaving any residue

Organise with a system!
The right file spine label for every use

No matter which file you use – the HERMA range offers the right solution: for narrow and wide standing and hanging files, in short or long versions with a thumb hole. For sticking on or slipping in, in white or colour. Guaranteed to deliver the best print results in black and white or colour.

Free, simple and quick: www.herma.com/lao

File spine labels

Permanent, in white and in standard colours

- Vibrant colours for clear organisation
- Permanently adhesive for long-term identification
- Ideal for covering existing labels
- For structure, clarity and prioritisation

Permanent colour coding for safe and professional processes

Available in white and in the four standard colours: red, yellow, blue and green – in various formats and pack sizes to suit every need. The labels on DIN A4 sheets ensure precise print results and permanent, reliable adhesion.

They adhere securely to files for long-term use, do not slip out of place and ensure a consistently neat, professional appearance even with frequent use. Ideal for structured filing systems, long-term identification, as well as sorting and visual organisation in offices, warehouses and dispatch departments.

File spine labels

Removable, white

- Opaque and removable for neat file spines
- Can be peeled off without leaving residue or damaging the file
- Adheres securely – even with frequent use

Adheres securely. Removes without residue.

The file spine labels make it easy to update the text when the contents or organisational structure change. The special adhesive ensures a secure hold during use and can be removed cleanly and without leaving any residue if required.
Even with frequent use, the labels remain firmly attached to the file.
The opacity ensures a consistently neat and professional appearance.

Silphie file spine labels

Permanent, in natural brown

- A modern kraft paper look, made from at least 35% Silphie fibres
- Reliable adhesion for professional file labelling
- Paper manufactured in Germany
- Reduced CO_2 emissions through regional value creation

SILPHIE LABELS

- PAPER MADE OF SILPHIE FIBRE
- CULTIVATION IN GERMANY
- MODERN KRAFT PAPER LOOK
- IDEAL FOR SUSTAINABLE BRANDS

A sustainable system based on responsibility

File spine labels made from Silphie paper combine a modern look with sustainable material innovation. Silphie fibres are a renewable raw material sourced from perennial crops. In addition to their environmental benefits, the labels feature a smooth surface that ensures clear lettering and reliable adhesion. This makes them ideal for professional filing systems in offices, administrative departments and home offices – wherever organisation needs to be implemented in a visible, lasting and responsible manner.

Inkjet file spine labels

Permanent, white, photo-quality

- Inkjet printing with sharp contours and maximum colour brilliance
- High-quality, coated speciality paper
- Permanently adhesive, for long-term identification
- Ideal for logos, lettering and professional filing systems

More than just labelling: file spine labels with style

These self-adhesive labels on A4 sheets have been specially developed for inkjet printers and, thanks to their all-round protective border, ensure trouble-free printing – even with challenging paper feeds.

Supplied blank, they offer maximum design freedom and adhere reliably even with frequent handling. Almost too good for the filing cabinet!

Slipping in rather than sticking on – another neat solution

Slip-in spine insert labels are the ideal solution for files with a transparent sleeve or slip pocket on the spine. Without the need for any adhesive, labels can be replaced quickly and neatly at any time – perfect for changing contents, projects or filing systems. The bright white, coated card provides a smooth surface and high opacity, ensuring that labels remain clear, high-quality and easy to read. Thanks to the fine micro-perforation, the spine labels can be separated precisely and cleanly.
This makes insertable spine labels offer a flexible solution for a wide range of filing needs.

Labelling that delivers more

HERMA labels for security and optimal organisation

- Secure labelling for engineering, safety, dispatch and warehousing
- Ideal for equipment, products, documents and sensitive content
- Special materials for special requirements
- Reliable quality for the office, retail and at home
- Solutions for QR codes, rating plates, deep-freezing and corrections

Not every label is standard

Some applications require particularly robust materials, visible security features, opaque coverage, reliable adhesion in cold conditions, or flexible solutions without full-surface adhesive. To meet these needs, HERMA offers special labels for both professional and domestic use.

Rating plate, security and QR code labels provide identification, protection and links to information. Correction and covering labels enable neat revisions, whilst jewellery labels are ideal for object identification. Deep-freeze and labels for shipping notes ensure clear information during storage and transport. Robust tags and perforated labels with adhesive strips on the back complete the range for flexible, temporary or non-full-surface adhesive identification.

Rating plate labels

- For permanent identification of inventory, property and components
- Matt polyester film with high-quality stainless steel finish
- Extra-strong adhesion, even on rough and difficult surfaces
- Weatherproof, tear-resistant, UV-resistant and temperature-resistant between -40 °C and +150 °C

Polyester film, extra-strong adhesion

Stay where it belongs

Where equipment, components or stock need to be clearly identified, HERMA rating plate labels ensure permanent professional identification. The high-quality stainless steel finish emphasises the technical character, while the robust film material remains reliable even under demanding conditions. Ideal for clear information, reliable identification and long-lasting labelling in engineering, operations and workshops.

FSC www.fsc.org FSC® C110972 The mark of responsible forestry

QR code labels

- For QR codes on product packaging, catalogues, promotional materials and coloured backgrounds
- Completely opaque for optimum readability and reliable scanning
- Ideal for creating digital links to websites, contact details, addresses and text
- Suitable for inkjet and laser printers, delivering excellent print results in black and colour

Paper, permanent adhesion

MOQ 1 | Laser Inkjet | 25 Sheets

Label format (mm)	Description	Colour	Form/ corners	Edge	Labels/ sheet	Ref. no.	Labels/ pack
40,0 x 40,0	opaque	white [2)]	rounded	all-round	24	9642	600
80,0 x 40,0	opaque	white [2)]	rounded	all-round	12	9643	300

[2)] full-size printing (distance between the labels)

One scan and you've got all the information

QR code labels provide direct access to digital information – quickly, easily and exactly where it's needed. Whether it's product data, instructions, contact details, websites or further information: these opaque labels ensure clear display and reliable scanning, even on coloured surfaces. QR codes can be easily created using the HERMA Label Assistant Online and printed onto the label.

Security labels

Exposing tampering

- For packaging and original seals, guarantee seals and tamper-evident identification markings
- Special film with a security feature and extra-strong permanent adhesion
- When peeled off, a white grid detaches from the labels. Once removed, it cannot be re-adhered to its original position or transferred to other objects

Special film with security feature, permanent adhesion

MOQ 1 | Laser | 25 Sheets

Label format (mm)	Description	Colour	Form/ corners	Edge	Labels/ sheet	Ref. no.	Labels/ pack
45,7 x 21,2	with special adhesive	white	rounded	all-round	48	4232	1200
63,5 x 29,6	with special adhesive	white	rounded	all-round	27	4233	675
Ø 40,0	with special adhesive	white [2)]	round	all-round	24	4234	600

[2)] full-size printing (distance between the labels)

Nothing goes unnoticed here

Where originality, integrity and control matter, HERMA security labels provide visible clarity. After a minimum adhesion time of 30 minutes, the security feature is activated and any attempts at tampering remain clearly traceable.
A professional solution for sensitive products, devices and seals.

Correction and covering labels

- Completely opaque for a clean finish
- Permanently adhesive for reliable corrections
- Ideal for covering text, images and outdated or incorrect labelling

Paper, permanent adhesion

MOQ 1 | Laser Inkjet | 25 Sheets

Label format (mm)	Description	Colour	Form/ corners	Edge	Labels/ sheet	Ref. no.	Labels/ pack
48,3 x 16,9	opaque	white	sharp	all-round	64	4226	1600
64,6 x 33,8	opaque	white	sharp	all-round	24	4227	600
97,0 x 42,3	opaque	white	sharp	all-round	12	4228	300
105,0 x 148,0	opaque	white	sharp	without	4	4229	100
210,0 x 297,0	opaque	white [1]	sharp	without	1	4230	25

[1] peel-off aid on reverse (cuts)

Simply stick them on:

Incorrect labelling, outdated information or a surface that needs a new purpose? These labels provide a quick and neat solution without the need to replace documents or packaging. The opaque surface reliably covers existing text and images, providing space for new, clearly legible information.

Jewellery labels

Outstanding in every detail

- For jewellery, watches, spectacles, cables and small items
- Non-adhesive central strip protects the surface
- Simply wrap it round like a banderole and stick the ends together
- Opaque, permanently adhesive, versatile and easily printable

Paper, permanent adhesion

MOQ 1 | Laser Inkjet | 25 Sheets

Label format (mm)	Description	Colour	Form/ corners	Edge	Labels/ sheet	Ref. no.	Labels/ pack
49,0 x 10,0	opaque	white [2]	rounded	all-round	60	5116	1500

[2] full-size printing (distance between the labels)

A clear view of the little things

Where space is limited and the item itself is not to be labelled, HERMA jewellery labels really come into their own. The narrow band-style design enables neat and professional labelling of jewellery, spectacles, cables and many other small items. Ideal for prices, product information or clear iidentification, they are versatile and suitable for use in many areas.

FSC www.fsc.org FSC® C110972 The mark of responsible forestry

Perforated labels with an adhesive strip on the back

- For notes, receipts and flexible labelling
- Adhesive strip on the back instead of full-surface adhesion
- Can be removed quickly and cleanly thanks to micro-perforation
- Can be printed as either a label or a tag, as required

Paper, permanent adhesion

MOQ 1 | Laser Inkjet | 100 Sheets

Label format (mm)	Description	Colour	Form/ corners	Edge	Labels/ sheet	Ref. no.	Labels/ pack
210,0 x 99,0	with micro-perforation *	white	sharp	without	3	4664	300

*can be separated individually by punching through the back

Holds firm while remaining flexible

Some information needs to be displayed clearly without covering an entire surface. HERMA perforated labels with an adhesive strip on the back combine secure attachment with flexible use. Whether used as a notice, an accompanying slip or a tag: the generous surface area provides space for personalised information and, thanks to the micro-perforation, can be applied quickly and neatly.

FSC www.fsc.org FSC® C110972 The mark of responsible forestry

Deep-freeze labels

Clear information, even in freezing conditions

- For product information, use-by dates and stock labelling
- Sticks securely even to surfaces that have already been frozen
- Can be applied at temperatures from –25 °C
- Resistant to temperatures between -60 °C and +60 °C

Paper, permanent adhesion

MOQ 1 | Laser Inkjet | 25 Sheets

Label format (mm)	Description	Colour	Form/ corners	Edge	Labels/ sheet	Ref. no.	Labels/ pack
38,1 x 21,2	with freezer-safe adhesives	white	sharp	all-round	65	4388	1625
66,0 x 33,8	with freezer-safe adhesives	white	sharp	all-round	24	4389	600

Stay cool and hang in there

Whether it's frozen goods, supplies, samples or chilled products: HERMA deep-freeze labels ensure that important information remains clearly legible even at sub-zero temperatures. The special adhesive adheres reliably even to items that are already frozen, helping to keep things organised wherever cold temperatures are part of everyday life. Ideal for use in kitchen, catering, laboratories and professional storage.

FSC www.fsc.org FSC® C110972 The mark of responsible forestry

Labels for shipping notes

So that nothing important is overlooked

- For warning, transport and custom shipping instructions
- Sticks securely to parcels, envelopes, rolls and film
- Suitable for inkjet printers, laser printers and copiers
- Free shipping templates in the Label Assistant Online

Paper, permanent adhesion

182,0 x 130,0	opaque, perforated	white	rounded	all-round	1	8316	25

Important information clearly displayed throughout the shipping process

Whether ‘Fragile’, ‘Do not bend’ or ‘Handle with care’, HERMA shipping instruction labels provide important information right where it needs to be seen. Whether custom-printed or designed using suitable templates, they help ensure clear and professional parcel dispatch, from a single parcel right through to the daily dispatch process.

Robust tags

Labelling without adhesion

- For product, price and item labelling
- Pre-punched and micro-perforated for quick processing
- Can be printed on both sides or labelled individually by hand

Paper-film-paper laminate, non-adhesive

Label format (mm)	Description	Colour	Form/ corners	Edge	MOQ 1	Laser Inkjet	100 Sheets	
						Labels/ sheet	Ref. no.	Labels/ pack
30,0 x 37,0	with micro-perforation	white	sharp	without		56	8044	5600
35,0 x 59,4	with micro-perforation	white	sharp	without		30	8046	3000
42,0 x 70,0	with micro-perforation	white	sharp	bottom		20	6871	2000

70,0 x 148,0	with micro-perforation	white	sharp	without		6	8047	600

Clearly identified and always flexible

Wherever products, goods or materials need to be clearly identified without attaching anything directly to the surface, HERMA's robust tags provide a flexible solution. Simply print them, tear them along the micro-perforation and attach them using the pre-punched holes. Ideal for textiles, stock items, rolls of fabric, products and transport units.

Regulations for media, data and archives

- For CDs, DVDs, mini-CDs and other data storage media
- For archiving, identifying and organising media
- Self-adhesive and suitable for for inkjet and laser printers
- Inserts for slim cases, sleeves and display cases
- For commercial and private media collections

Organisation that makes content visible

Whether it’s a project archive, image files, training materials, music, videos or personal collections, physical storage media remain relevant when content needs to be stored permanently, organised clearly and retrieved quickly.
HERMA labels and inserts create clear structures for this purpose, in businesses, archives and personal media collections.

Self-adhesive labels for CDs, DVDs and mini-CDs, as well as inserts for slim cases and sleeves, ensure clear identification and professional presentation. Legacy storage media such as floppy disks, VHS cassettes, slides, ZIP disks and cartridges can also be reliably labelled with their content descriptions, dates, project references or archive numbers.

Overview of vignettes

Are you looking for a very specific label format? Then you've come to the right place.

The labels are sorted in ascending order by format.
The available versions are shown below each format.
Corresponding product details can be found on the pages indicated.

The back says it all...
The item number on the back of the sheet makes it easier to identify sheets that have already been removed from the pack. It also ensures that the item number selected in the software matches the sheet. This helps to prevents misprints. Reorders are also no problem, even if you only have one sheet left.

HERMA label finder

Here you can quickly and easily find the right label for you
www.herma.co.uk/office-home/label-finder

- Quickly find your way around the large HERMA label assortment
- Targeted search by category, sheet size and label size
- Ideal if the item number or exact product name is not known
- Saves time and reduces incorrect purchases
- Direct route from need to the right label
- Practical online service – available at any time

1 Make a selection
Select the product, shape and size

2 Show results
